PREFACE

The first edition of this Union List entitled "Union List of Serials of the San Francisco Bay Region" was published in 1939 and listed the holdings of forty cooperating libraries. A supplement, published in 1942, incorporated changes in holdings from 1938 to 1941 and added the records of nine libraries not included in the first edition.

The present compilation--a simplified list of periodicals and newspapers rather than of serials--in reality constitutes a new publication and shall be referred to as a second edition. It includes the holdings of forty-two libraries, twenty-four of which contributed to the first edition. The contributing libraries represent varied collections ranging from college and university department libraries to business, technical and large public libraries. With two exceptions, Mills College and Mechanics' Institute, libraries of the San Francisco Bay Region whose holdings are included in H. W. Wilson's "Union List of Serials" are not represented in this list.

Scope: The new edition includes newspapers, periodicals, proceedings, journals and transactions of societies issued at regular intervals of less than a year. It differs from the first edition in that it excludes annuals, yearbooks, monographs and government publications. However, well-known government periodicals, e.g., Monthly Labor Review will be found. Realizing its value to those using the list, we have included as much local material as possible. No attempt was made to include historical files of early California magazines as these will obviously be found in all large public libraries in the area. A special collection of trade union papers as well as the more important house organs have been included. A new feature is the list of newspaper holdings at the end of the volume.

Form of entry: In most cases, place of publication, date of first issue, volume numbers and complete histories of title changes have been omitted. Brief notes giving former names only have been substituted. All holdings have been reported by dates rather than by volume numbers. Author and place of publication have been shown for foreign publications and identical titles.

A periodical published by a society but having a distinct title is entered under the title with reference from the name of the society. Journals, transactions, bulletins, and proceedings of societies are entered under the name of the society. Colleges and universities having a geographical designation are entered under the name of the city, state or country included in the title. References have been made from earlier forms of a title or name to the latest form known.

Cooperating libraries are denoted by a code of initials, the key to which appears in the front of this publication, together with an explanation of abbreviations and symbols.

This volume should be used in conjunction with the first edition for two reasons: First, a few libraries included in the first edition are not included in this list; secondly, to facilitate the work of the cooperating libraries in reporting their holdings, it was decided to omit all histories and experiment with this simplified list. Therefore, the first edition is valuable to anyone desiring a complete history of title changes and volume numbers.

All requests for loans and privileges to use the cooperating libraries are subject to the regulations of the individual libraries. Many libraries are equipped with microfilm and photostating facilities which can be used when loan of the original material is impractical.

The work of collecting, compiling and editing this material has been done by a volunteer committee on its own time. To this committee, Mrs. Agnes Reinero of Pacific Gas and Electric Company, Mrs. Ruth Lyons of Western Pacific Railroad, Miss Caroline Martin, Miss Katherine Karpenstein and especially Mrs. Margaret Rocq of Standard Oil Company of California, the Chairman wishes to express her sincere appreciation for their generosity and untiring efforts.

Special thanks are due also to the Standard Oil Company of California for its contribution of supplies and to the Business Branch of the San Francisco Public Library for the use of its facilities.

In conclusion, the committee sincerely hopes that its efforts in producing this reference tool will be of great value to libraries and business organizations using it.
